EDUCATION

Ph.D. student in theoretical neuroscience Gatsby Unit, University College London, United Kingdom Edmond and Lily Safra Center, The Hebrew University of Jerusalem, Israel <i>Working on kernel descriptions of chaos in recurrent models of the brain.</i> Advisors: Agostina Palmigiano and Jonathan Kadmon	10/2022–
Research stay Summerfield lab, University of Oxford, United Kingdom Modelled cognitive flexibility with linear neural networks.	11/2023–04/2024
M.Sc. in physics GPA 1.0/1.0, with distinction RWTH Aachen University, Germany Focussed coursework on Statistical Mechanics of Neural Networks, Theoretical Neuroscience, Deep Learning in Physics Research, Quantum Information, and Computational Physics	2019–2022
Master's thesis Juelich Research Center, Germany <i>Analysis of computation in cortical networks by Gaussian process regression.</i> Advisors: Prof. Moritz Helias, Dr. Christian Keup (now EPFL Switzerland)	09/2021–08/2022
Bilateral graduate exchange program The University of Tokyo, Japan Focussed coursework on Tensor Networks and Universal Biology, which investigates stem cell differentiation and evolution by a mathematical, complex systems approach. Member of Japanese university choir "The White Rose".	09/2019–03/2020
B.Sc. in physics GPA 1.3/1.0, with distinction RWTH Aachen University, Germany	10/2016–09/2019
Bachelor's thesis Juelich Research Center, Germany <i>Description of unsupervised learning in Boltzmann machines via Feynman diagrams.</i> Advisors: Prof. Moritz Helias, Dr. Tobias Kuehn (now ENS Paris) <i>4x teaching assistant</i> in theoretical physics and lab courses, mentoring 1 st to 10 th semester students.	03/2019–09/2019

PROFESSIONAL EXPERIENCE

MATS 10.0 Fellowship

02/2026–08/2026

Berkeley, United States

Built meta-models ([AOs](#), [LoRAcles](#)) to audit LLMs when black-box monitors fail.

Mentor: Neel Nanda

PIBBSS Fellowship

06/2024–09/2024

London Initiative for AI Safety, London, United Kingdom

Mechanistic interpretability of neural geometry behind chain-of-thought, [public talk](#)

Mentor: Jan Hendrik Kirchner (Anthropic)

Research Internship

03/2021–06/2021

Bosch Center for Artificial Intelligence, Renningen, Germany

Co-developed and implemented architectural extensions of Bayesian version of the Neural Process model.

Advisor: Michael Volpp

HONOURS

HUJI International PhD Talent Scholarship

since 2023

Springorum memorial coin for outstanding graduates

2022

Scholarship fellow of the Konrad Adenauer Foundation (one of 13 academic talent promoters established by the Federal Ministry of Education and Research) 2016-2022

Fellow of RWTH Aachen University's **Dean's List** of top 5% students

since 2019

PRESENTATIONS

- Invited talk **Temporal feature learning**, Institute for Advanced Simulation, Juelich, Germany 10/2025
- Poster **Recurrent networks under constraint of sparse reward learn interacting belief state dynamics**, COSYNE 2024, Lisbon, Portugal 03/2024
- Talk **Can discrete neurons be useful?**, ELSC Annual Retreat, Nahsholim, Israel 06/2023
- Poster **Discrete communication mediates effective regularization in chaotic recurrent networks**, COSYNE 2023, Montréal, Canada 03/2023
- Random Matrix Theory for Machine Learning**, Parallel Sessions of INM-6 Annual Retreat 05/2022
- Inference with Graphical Models**, Book Club of Institute for Neuroscience and Medicine, Juelich Research Center 10/2021
- Proof-read and advised high school textbook** together with teacher Dr. Bardo Diehl at didactics congress MNU Aachen in front of 40 participants (*"Zentrale Experimente für das Abitur", Cornelsen 2017*) 04/2017

SCHOOLS & WORKSHOPS

- 12-day workshop "Analytical Connectionism"** 09/2023
University College London, United Kingdom
- 3-week summer school "Mathematical Methods in Computational Neuroscience"** 07/2023
NTNU, Norway
- 5-day workshop "Recent advances in understanding artificial and biological neural networks"** 02/2023
Les Houches School of Physics, France
- 5-day summer school "Reinforcement Learning"** 06/2022
Vrije Universiteit Amsterdam

TEACHING EXPERIENCE

- Statistical Physics and Field Theory summer 2022
- Theory of Electromagnetism winter 2022
- Preparatory math course for computer scientists 10/2020

Theory of Thermodynamics	winter 2020
Introductory lab course for physicists	09/2018
Introduction to Theoretical Physics (1 st year B.Sc.)	winter 2018

LEADERSHIP AND OUTREACH

Social commitment

Volunteer at the City of Aachen, supporting Egyptian family with homework and administrative tasks 2017–2020

Co-organisation of "LernFair"-AI lessons, part of a project aimed at high school students during the pandemic winter 2021

Full-time scholarship by the Konrad Adenauer Foundation 2016–2022

Elected **spokesperson** of local group of 25 students 2019–2020

Increased participation of students by bundling proposals for engaging and meaningful group activities, such as a volunteer week in kindergarten in socially deprived suburb of Aachen

Initiated and organized **4-day seminar on the scientific voice in democracies**, with invited speakers on the philosophy of science, politics, recent societal challenges, and science communication 04/2022

[Service](#) to inform about cancellation of school lessons in the early morning before classes start 2015

Development of [mobile app](#) to create a precise elevation map of Aachen by use of barometer data of phones, targeted at finding a least elevation bicycle route 2016

[Application of machine learning and Fourier decomposition](#) to successfully remove chequered paper background from handwritten lecture notes 2020

SOFTWARE AND LANGUAGE PROFICIENCY

Software

Python, JAX, PyTorch

3D computer graphics with Blender

Languages

German (native)

English (academic proficiency, daily usage)

French (good, DELF A2)

Japanese (good, weekly practice with Tandem partner)

RECREATIONAL ACTIVITIES

Bicycle touring and medium distance running (olympic-distance triathlon in September 2022)

Singing in university choir (tenor voice)
